

ALIVIT^{pharm}

Fermented garlic in
SYNERGY
with extracts of medicinal herbs

BLACK GARLIC

Soft gelatin capsules

WHO ARE WE?

AlivitPharm presents distinctive products with meticulously crafted compositions. Harnessing the potency of fermented garlic, complemented by extracts from medicinal plants utilized for centuries in both folk and traditional medicine, along with an array of vitamin and mineral supplements, our offerings deliver highly effective benefits in addressing a variety of health concerns.

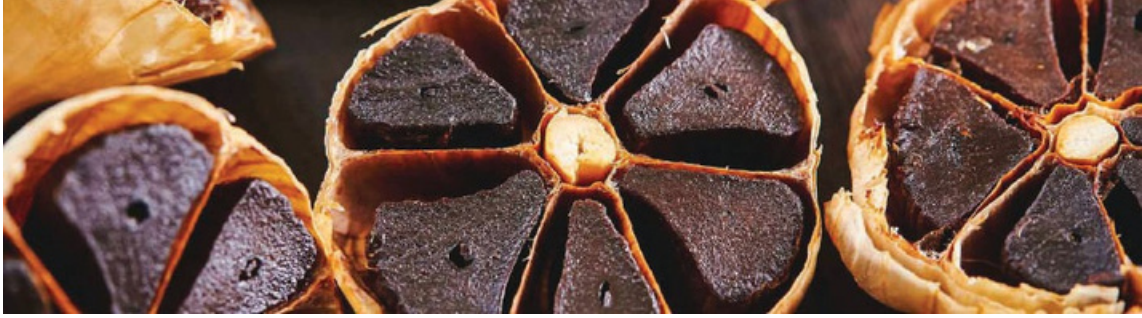

WHAT MAKES OUR PRODUCTS UNIQUE?

AlivitPharm is a trailblazer in the domestic market, having been the first to integrate the synergy of fermented garlic with medicinal herbs indigenous to our region into dietary supplements. These medicinal herbs are cultivated under rigorously controlled conditions or freshly harvested from pristine areas to guarantee the highest concentration of beneficial active compounds, thereby maximizing product efficacy. Furthermore, our innovative technology for producing soft gelatin capsules, which distinguishes us as the first in the Balkans, ensures that our formulations possess superior bioavailability and facilitate easier ingestion.

The mission of AlivitPharm is to maintain the natural synergy of medicinal plants that safeguard and enhance our immune system.

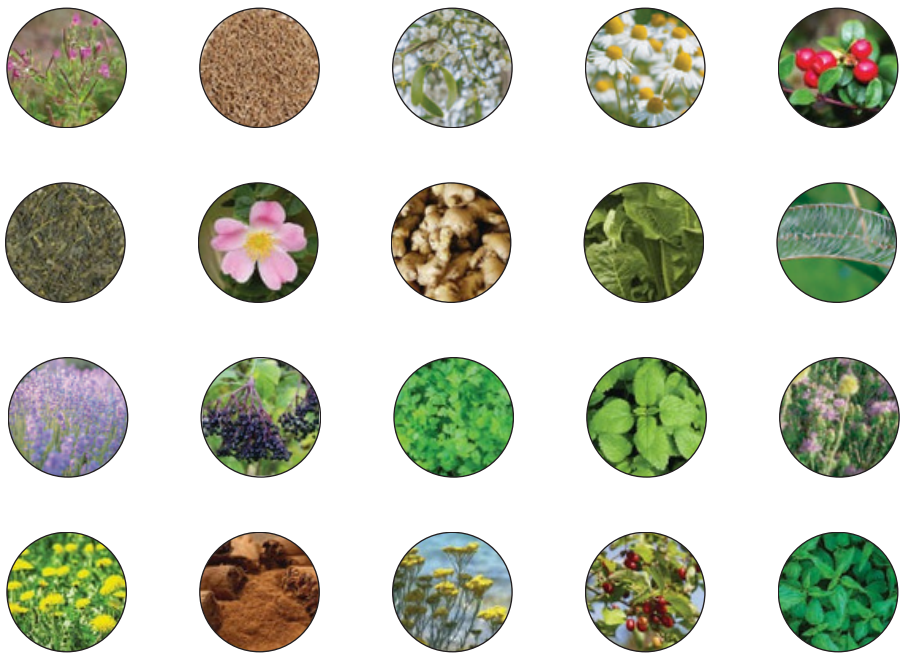

The objective of AlivitPharm products is to promote prevention and sustain our health through natural means.

SYNERGY

with medicinal herbs

GARLIC

The use of garlic in human nutrition dates back to ancient times, starting with the builders of the pyramids in Egypt, through the Roman legions where garlic became a symbol of the health, strength and power of the soldiers, until modern times. Garlic remains one of the most important foods in the human diet and an additional "panacea" medicine for all diseases.

HERZEGOVIAN GARLIC

Hercegovinian garlic is considered one of the highest-quality varieties in the world. Cultivation under strictly controlled conditions in the Herzegovina region allows our products to achieve exceptional quality characteristics. As a result, they are ranked among the top five in the global classification. The outstanding quality of Hercegovinian garlic is attributed to the favorable Mediterranean climate and the mineral-rich limestone soil.

WHAT IS BLACK GARLIC - FERMENTED GARLIC?

Through a controlled fermentation process, fresh garlic is transformed into Black Garlic (fermented garlic), a product that allows us to consume up to ten times more antioxidants without causing stomach irritation or an unpleasant odor after consumption. Modern, optimized fermentation, lyophilization, and extraction technologies ensure the production of high-quality fermented garlic raw material.

ATEROSTOP BLACK GARLIC

lowers elevated levels of body fat

reduces high blood pressure

potent antioxidant

prevents and aids in atherosclerosis

ATEROSTOP is intended for the following conditions:

- Coronary artery blockage
- High blood pressure
- Regulation of LDL and HDL cholesterol
- Other cardiovascular disorders
- Irregular heart rhythm
- Ischemic damage to cardiac function
- Poor blood supply to the heart muscle / reduced cardiac contraction strength
- Atherosclerosis prevention
- Preventive support – predisposition to high cholesterol

<https://www.alivitpharm.com/sr/proizvod/aterostop/>

Atherosclerotic alterations in blood vessels represent the predominant cause of coronary disease, cerebrovascular complications, and peripheral arterial circulation disorders. Hyperlipoproteinemia serves as a significant risk factor in the onset of these conditions. Notably, an elevation in LDL, coupled with a concurrent reduction in HDL cholesterol, alongside hypertension, poses a particular risk.

Aterostop reduces hypertension and regulates cholesterol metabolism, and normalizes LDL and HDL cholesterol levels, effectively contributing to the prevention of atherosclerosis. Hawthorn leaves and flowers promote the dilation of coronary blood vessels and positively influence blood flow to the heart muscle.

• 90 hard gelatin capsules

• Nutritional supplement

• Gluten-free

Dosage: 3 times 1 capsule during or after meals.

WHY ATEROSTOP?

Fermented garlic has strong antioxidant and anti-inflammatory effects, helps normalize LDL and HDL cholesterol levels, and maintains normal homocysteine levels. It also supports the reduction of high blood pressure and exhibits anticoagulant properties.

Hawthorn has a positive effect on the cardiovascular system, enhancing blood flow through the myocardium while reducing peripheral vascular resistance. The active compounds in hawthorn flowers and leaves also exhibit antioxidant activity, protecting cells from damage caused by free radicals, which are implicated in many diseases.

Wild garlic is a powerful agent in the fight against oxidative stress, lowers blood pressure, fat levels in the body and has a cardioprotective effect. This plant has the potential to restore cardiac function after ischemic damage.

Lemon balm has spasmolytic and soothing effects, as well as positive effect on the heart function. It is used as an antiarrhythmic agent, it leads to a negative chronotropic and dromotropic effect.

For references and more information, scan the code .

*AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.

** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).

CARDIO PLUS BLACK GARLIC

- neutralizes free radicals
- naturally regulates high blood pressure
- regulates the level of triglycerides
- prevents atherosclerosis
- reduces elevated LDL and increases HDL cholesterol

CARDIO PLUS is intended for the following conditions:

- Heart failure (weakened heart function)
- Arrhythmia
- Angina pectoris
- Adjunct to diabetes therapy
- Elevated triglyceride levels
- Hypercholesterolemia (high cholesterol levels)
- Hypertension (high blood pressure)
- Preventive support – predisposition to cardiovascular diseases

<https://www.alivitpharm.com/en/product/cardio-plus/>

Hypertension is a very common health issue today, which, if left uncontrolled, can lead to many more serious conditions. Several cardiovascular diseases are either associated with or more pronounced in hypertension, including atherosclerosis, coronary heart disease, aortic aneurysm, and heart failure.

Cardio Plus contains plant-based ingredients that help maintain normal cardiovascular function and prevent heart failure. This supplement is specifically intended for individuals with hypercholesterolemia (elevated cholesterol levels), some form of heart failure (weakened heart function), or hypertension (high blood pressure). However, it can also be used by healthy individuals, especially those with a positive family history of cardiovascular diseases.

- 90 softgel capsules
- Dietary supplement
- Contains soy and is gluten-free

Dosage: 3 x 2 capsule during or after meals.

WHY CARDIO PLUS?

Fermented garlic has a strong antioxidant and anti-inflammatory effect, naturally lowers elevated fat levels in the body, has an anticoagulant effect and is cardioprotective.

Hawthorn has a positive effect on the cardiovascular system, increases blood flow through the myocardium, and reduces peripheral resistance in blood vessels. Hawthorn has both antiarrhythmic and antihypertensive effects. It is recommended for use in mild forms of heart failure, arrhythmia, hypertension, atherosclerosis and cerebral insufficiency.

White mistletoe has a cardioprotective effect and a beneficial effect on heart function in people suffering from heart failure. It is used to relieve hypertension and prevent atherosclerosis.

For references and more information, scan the code.

*AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.

** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).

DIABETSTOP BLACK GARLIC

helps regulate blood glucose levels

powerful antioxidant

prevents and reduces complications in diabetes

Diabetstop is intended for the following conditions:

- As an adjunct to Type I and Type II diabetes therapy, supporting both glycemic control and nerve protection from oxidative stress (helping to prevent the development of polyneuropathy) and thereby delaying or preventing diabetes-related complications.
- For individuals with borderline blood glucose levels, following specific dietary regimens but not on insulin therapy.
- As a supplement to metformin therapy.
- For regulation and control of three-month (HbA1c) blood sugar levels
- For individuals with insulin resistance
- For overweight or obese individuals with elevated blood lipid levels
- For sedentary individuals
- For those consuming excessive sugar in their diet
- For women with polycystic ovary syndrome (PCOS) to prevent insulin resistance
- Preventive support – for individuals with a genetic predisposition to diabetes

<https://www.alivitpharm.com/en/product/diabetstop/>

Diabetes mellitus (sugar disease; diabetes) is a chronic disease from the group of metabolic disorders. It occurs when the body cannot process all the sugar in the bloodstream, and complications can lead to heart attack and stroke, blindness, and kidney failure. Diabetes depends on genetic or environmental factors, but it can be controlled by maintaining optimal blood sugar levels through a healthy diet, active lifestyle and appropriate supplementation.

Diabetstop is a dietary supplement with a very complex composition. It is primarily intended for people suffering from type I and type II diabetes, but also for all other people who have a sugar metabolism disorder, as well as those who have a positive family history of diabetes.

- 90 hard capsules
- Dietary supplement
- Gluten-free

Dosage: 3 X 1 capsule during or after a meal.

WHY DIABETSTOP?

Fermented garlic possesses strong antioxidant and anti-inflammatory properties, supports normal immune system function, and helps maintain normal blood glucose levels

Cinnamon increases insulin sensitivity, which can help lower blood sugar levels and contribute to better glycemic control. It reduces the amount of sugar entering the bloodstream after meals by slowing the breakdown of carbohydrates in the digestive tract.

- B1** → accelerates the metabolism of carbohydrates and provides the body with
- B6** → helps in the metabolism of proteins, fats and carbohydrates for energy
- B12** → plays a role in cell division, contributes to normal energy generation, normal functioning of the nervous system and reducing fatigue and exhaustion
- Cr** → improves blood glucose control in individuals with prediabetes or type 2 diabetes
- Zn** → it has a positive effect on insulin and helps transport glucose into cells, where it is used for energy. It also supports the storage of nutrients in the body
- FOLIC ACID** → it helps prevent fatigue, insomnia, and depression, and plays a role in cell division
- ALPHA-LIPOIC ACID** → a powerful antioxidant and anti-inflammatory agent, it supports normal glucose metabolism and nervous system health, improves cognitive function, and alleviates symptoms of diabetic polyneuropathy

For references and more information, scan the code.

**AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.*

*** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).*

DIGESTIV BLACK GARLIC

regulates bowel function

reduces bloating, cramps,
nausea, and heartburn

speeds up gas elimination

soothes inflammation of the
stomach and intestinal mucosa

DIGESTIV is intended for the following conditions:

- For digestive system issues – cramps, indigestion, bloating, intestinal motility, and microflora support
- Dyspepsia (heartburn)
- Adjunct therapy for gastritis, inflammatory bowel diseases, ulcerative colitis, ulcers, and Crohn's disease
- Preventive support – for individuals with a predisposition to gastroenterological disorders

<https://www.alivitpharm.com/en/product/digestiv/>

Digestive issues can cause significant problems in everyday life. In fact, nearly 80% of immune system cells are located in the digestive system. Since intestinal problems affect the immune system of the entire body, it can be said that a healthy gut is a prerequisite for overall health.

Digestiv capsules contain six plant extracts whose active compounds work synergistically to alleviate digestive discomforts, such as functional dyspepsia, irritable bowel syndrome, and gastritis. They help reduce stomach pain, a feeling of fullness, bloating, digestive cramps, belching, nausea, and heartburn.

- 90 soft gelatin capsules
- Dietary supplement
- Gluten-free

Dosage: 3 X 1 capsule during or after a meal.

WHY DIGESTIV?

Fermented garlic promotes intestinal peristalsis and enhances the expulsion of gases, making it advisable for individuals experiencing slow bowel movements, constipation, and obstipation. The antimicrobial properties of garlic, in conjunction with the gastroprotective effects of olive oil, facilitate the regeneration of the inflamed mucosa within the digestive tract.

Chamomile relaxes the smooth muscles of the gastrointestinal tract, diminishes gas formation, and facilitates its elimination. It is advised for cramps due to its carminative properties, as well as for digestive disturbances.

Mint possesses antispasmodic, anti-inflammatory, carminative, choleric, and cholagogue properties, and it can also serve as an antidiarrheal and antioxidant.

Cumin relaxes the smooth muscles of the gastrointestinal tract and functions as a carminative, antimicrobial, and antioxidant. It may assist in the treatment of *Candida* spp.

Angelica serves as an aromatic, bitter stimulant and plays a crucial role in promoting digestive health, alleviating gas, and minimizing bloating. The root of Angelica possesses antibacterial and antifungal properties.

Rosemary serves as an effective antiseptic, antispasmodic, astringent, carminative, diaphoretic, digestive aid, and stomachic, making it beneficial in the treatment of various digestive system disorders. It is recognized for its antiseptic properties within the digestive tract, helping to prevent and alleviate flatulence. Additionally, it is employed to address dyspeptic issues, gastric sluggishness, and lethargic intestines.

**AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.*

*** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).*

HEPATO CARE BLACK GARLIC

helps reduce liver fat and enzyme levels

supports liver regeneration

powerful antioxidant

regulates bile secretion

Hepato care is intended for the following conditions:

- Fatty liver, elevated liver enzyme levels
- Cirrhosis, liver inflammatory processes
- Liver regeneration
- As an adjunct to statin therapy
- Alongside antibiotic, analgesic, and other drug therapies
- Excessive consumption of alcohol, carbonated drinks, etc.
- Supports treatment of hepatocellular carcinoma
- Elevated blood cholesterol and triglycerides
- Adjunct to statin therapy – helps neutralize the negative effects of statins
- Preventive support – liver detoxification
- For healthy individuals – at least 2–3 months per year

<https://www.alivitpharm.com/en/product/hepato-care/>

The liver plays a key role in digestion by producing bile, and is also essential for cholesterol metabolism, blood detoxification, and filtering toxic substances from the body. Excessive intake of harmful substances, an unhealthy diet, alcohol, and long-term medication use can gradually impair liver function. Therefore, prevention is the best approach to maintaining liver health.

Hepato Care capsules contain plants that support liver regeneration. As powerful antioxidants, they help regulate liver enzyme levels, promote digestion, and support the functions of the liver and gallbladder.

- 90 soft gelatin capsules
- Dietary supplement
- Contains soy and gluten-free

Dosage: 3 X 1 capsule during or after a meal.

** Our products have a higher tolerance when used simultaneously with pharmacotherapy for various pathological conditions.*

*** In addition to the effect on the primary indication, all preparations have a beneficial effect on a number of other metabolic disorders (hypertension, dyslipidemia, diabetes, atherosclerosis, etc.).*

WHY HEPATO CARE?

Fermented garlic is a powerful antioxidant that helps lower liver enzyme levels, which can be elevated due to various liver disorders, including fatty liver disease.

Dandelion has a pronounced antioxidant, anti-inflammatory and hepatoprotective potential, so it is used for damaged liver tissue due to excessive intake of alcohol and drugs. It can also be recommended for inflammation of the gallbladder, gallstones, indigestion, and it is widely used as an auxiliary tool in the treatment of viral hepatitis.

Yarrow is used in the treatment of inflammatory conditions of the gastrointestinal and hepatobiliary tract. It also favorably affects the creation and excretion of bile juices.

Immortelle (*Helichrysum italicum*) has been used to support liver and gallbladder function, as well as to address inflammation and infections. In addition to its anti-inflammatory and antimicrobial effects, immortelle exhibits antioxidant activity, neutralizing free radicals and protecting against oxidative stress.

B1

→ accelerates carbohydrate metabolism, providing the body with necessary energy

B2

→ supports the metabolism of proteins, fats, and carbohydrates, as well as proper liver function

B6

→ supports the body in antibody production and plays an important role in processes essential for cellular respiration and growth

vitamin
E

→ reduces liver inflammation and lowers markers of liver damage in individuals with fatty liver

For references and more information, scan the code.

**AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.*

*** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).*

IMMUNO ACTIVE BLACK GARLIC

fortifies a compromised immune system

potent antioxidant

prevents the onset of upper respiratory tract infections

Immuno active is intended for the following conditions:

- Suitable for everyone to support immune health
- Chronic patients, individuals with diabetes
- People under significant physical or mental stress
- Individuals prone to frequent infections
- Recommended for oncology patients as well
- For respiratory infections – cough, sore throat, and inflammation of the mucous membranes of the upper respiratory tract and urinary tract
- Poor blood profile
- Exhaustion, fatigue, irritability
- Post-COVID, during travel, allergies, herpes
- Chronic patients, individuals with diabetes

<https://www.alivitpharm.com/sr/производ/immuno-active/>

Immunity, or the immune system, serves as the body's defense mechanism. Its primary function is to safeguard the body against a multitude of harmful influences, including foreign entities such as viruses, bacteria, fungi, parasites, microorganisms, toxins, and tumors produced by the body itself. Enhancing immunity has emerged as a priority in contemporary supplementation. A robust immune system is essential for determining whether the body can combat viruses and withstand severe symptoms and long-term illnesses or will yield to these symptoms.

- 90 softgel capsules
- Dietary supplement
- Contains soy and is gluten-free

Dosage: 2 x 1 capsule taken during or after meals.

WHY IMMUNO ACTIVE?

Fermented garlic helps protect against stress and, due to its antibacterial and antioxidant properties, supports immune system health. It has also been traditionally used as an herbal remedy to alleviate the symptoms of colds and influenza.

Black elderberry is recommended for the prevention and treatment of upper respiratory tract infections due to its antioxidant and immunomodulatory effects. By stimulating cytokine production, it activates the immune system and can reduce the duration of influenza by 3–4 days. In vitro studies have shown that black elderberry is effective against as many as ten strains of the influenza virus.

Ginger has been shown in numerous studies to have antimicrobial properties, and its use is recommended for various viral and bacterial infections.

Wild rose is traditionally recommended for strengthening the immune system and combating spring fatigue and exhaustion, due to its high vitamin C content.

D3

It has the ability to modulate both innate and adaptive immune responses. A deficiency of this vitamin is associated with an increased risk of autoimmune diseases, as well as greater susceptibility to infections.

Se

It contributes to the protection of cells against oxidative stress.

Zn

It demonstrates immune-stimulating properties, both by markedly increasing the levels of specific defensive substances and by directly binding to the envelope of certain viruses, thereby preventing infection.

vitamin
C

It enhances iron absorption, helps reduce fatigue and exhaustion, minimizes cold symptoms, and shortens the duration of illness.

For references and more information, scan the code.

NEURO BLACK GARLIC

exhibits a neuroprotective effect

potent antioxidant

assists with neurodegenerative disorders and sleep disturbances

NEURO is intended for the following conditions:

- Exhaustion
- Sleep disturbance
- Inadequate focus
- Cognitive exhaustion
- Neurodegenerative alterations
- For individuals who experience migraines
- Prevention of dementia
- Mitigating and decelerating the progression of Alzheimer's disease
- Assists in managing Parkinson's disease
- Diabetic neuropathy
- Radiculopathy, sciatica, peripheral nerve injury
- Neurological issues following traumatic events
- Neuralgia, central circulatory conditions

<https://www.alivitpharm.com/sr/производ/neuro/>

Oxidative stress is characterized by weakness, rapid fatigue, and lethargy, accompanied by insomnia, diminished motivation, and an accelerated heartbeat. Neurodegenerative alterations are becoming an increasingly prevalent outcome of contemporary lifestyles. The advancement of these changes can be mitigated through lifestyle modifications and suitable supplementation.

Neuro capsules comprise fermented garlic, rosemary, lavender, and green tea, all of which possess potent antioxidant and neuroprotective properties. They are recommended for the prevention and alleviation of neurodegenerative diseases. Owing to their anti-inflammatory effects and significant impact on microcirculation, these herbs are utilized in the treatment of diabetic polyneuropathy and various radiculopathies.

- 90 softgel capsules
- Dietary supplement
- Contains soy and is gluten-free

Dosage: 2 x 1 capsule taken during or after meals.

WHY NEURO?

Fermented garlic exhibits antioxidant, anti-inflammatory properties and neuroprotective action and has a positive effect on microcirculation, so it can be used in diabetic polyneuropathy and various radiculopathies.

Lavender has a beneficial effect on nervous exhaustion and sleep disturbances. It exhibits neuroprotective properties, making it useful in conditions such as Alzheimer's disease and dementia. It is also used as an adjunct in the management of psychiatric conditions, including anxiety and depression.

Rosemary has a beneficial effect on neurodegenerative diseases, such as Alzheimer's and Parkinson's disease. Rosemary has also shown positive effects in mild psychiatric conditions, such as stress, anxiety and depression.

Green tea exhibits neuroprotective effects and is used for the prevention or as an adjunct in the management of neurodegenerative diseases, such as Alzheimer's and Parkinson's disease.

B1

→ Fundamental for the function of nerve and cardiovascular cells, providing essential energy.

B2

→ Supports normal nervous system function and protects cells from oxidative stress

B6

→ A powerful antioxidant and anti-inflammatory agent, contributing to overall nervous system health.

Se

→ Enhances cognitive function and alleviates symptoms of diabetic polyneuropathy.

vitamin
E

→ Reduces anxiety, depression, and fatigue; in combination with other antioxidants, may improve mood and cerebral blood flow.

ALPHA-LIPOIC ACID

→ Plays a crucial role in neurotransmitter production and myelin formation, accelerates nerve recovery, and helps prevent the spread of nerve damage.

For references and more information, scan the QR code

**AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.*

*** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).*

POTENT MAX BLACK GARLIC

regulates erectile function

positively supports male fertility

improves circulation

enhances libido and stimulates sexual activity

POTENT MAX is intended for the following conditions:

For men aged 30+

- Erectile dysfunction
- Loss of libido
- Lack of strength and energy
- To increase testosterone levels
- Male infertility of unknown etiology
- Poor semen quality
- For men undergoing in vitro fertilization (IVF)
- For men engaged in training or athletic programs

<https://www.alivitoharm.com/sr/produkt/botent-max/>

Impotence affects approximately one in ten men in their thirties, around 50% of men at 65, and 75% of men at 80. Financial problems, workplace and family stress, heavy responsibilities, unhealthy lifestyle, vitamin deficiencies, fatty foods, smoking, and alcohol are all potential contributing factors to male impotence. While many men turn to medication, natural supplements can provide a more lasting and effective solution.

Potent Max contains plant species that support the regulation of erectile function and sexual activity. Tribulus terrestris (commonly known as “puncturevine”) enhances libido and stimulates sexual activity. Due to its positive effect on testosterone levels, it is recommended for use in cases of erectile dysfunction and male infertility of unknown etiology.

- 90 softgel capsules
- Dietary supplement
- Contains soy and is gluten-free

Dosage: 3 X 2 capsules during or after a meal.

WHY POTENT MAX?

Fermented garlic positively influences blood vessels, enhances circulation, and neutralizes free radicals.

Granny's tooth (Tribulus terrestris) is a botanical species that has historically been utilized as a sexual stimulant and in addressing male infertility. The efficacy of this plant in treating erectile dysfunction and male infertility can be ascribed to its potent antioxidant properties and influence on testosterone levels.

Fenugreek seeds are advised for addressing erectile dysfunction and various sexual issues. Numerous studies have demonstrated that fenugreek is highly effective in treating conditions associated with low androgen levels. The consumption of fenugreek results in enhanced sexual function, improved libido, and elevated serum testosterone levels in middle-aged and older men.

**AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.*

*** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).*

PROSTAT BLACK GARLIC

benign prostatic hyperplasia (BPH)

reduces the sensation of premature bladder emptying

frequent and challenging urination

acute prostatitis

PROSTAT is intended for the following conditions:

For men aged 45+

- Benign prostatic hyperplasia (enlarged prostate)
- Frequent and difficult urination
- Acute prostatitis
- Weakened bladder function
- Poor circulation
- Prevention of prostate enlargement and related symptoms

<https://www.alivitpharm.com/en/product/prostat/>

Enlarged prostate occurs in approximately 50% of men aged 50–60, increasing to as much as 90% in men over 80. Benign prostatic hyperplasia (BPH) is the most common non-cancerous form of cellular growth in men. Overactive bladder syndrome affects around 20% of the global population and, when combined with BPH, can significantly impact daily quality of life.

Prostat contains plant species that help alleviate symptoms associated with benign prostatic hyperplasia, including frequent and difficult urination, as well as acute prostatitis.

- 60 softgel capsules
- Dietary supplement
- Gluten-free

Dosage: 3 X 1 capsule during or after a meal.

WHY PROSTATAT?

Fermented and fresh garlic, in addition to their strong antioxidant effects, also exhibit anti-inflammatory and antimicrobial properties. They are particularly useful in the prevention and alleviation of symptoms associated with chronic prostatitis and weakened bladder function.

Pumpkin seed oil is rich in vitamins A, E, K, B-complex vitamins (B1, B2, B3, B6, and B9), and vitamin C. It also contains minerals such as magnesium, manganese, calcium, phosphorus, with trace amounts of iron, copper, and selenium, and is an excellent source of zinc. Traditionally, it has been used as an effective remedy to alleviate symptoms associated with benign prostatic hyperplasia, including frequent (especially nocturnal) urination, and to support bladder function. Additionally, due to its high content of omega-3 and omega-6 fatty acids, pumpkin seed oil exhibits strong anti-inflammatory properties, making it beneficial in the management of prostatitis.

For references and more information, scan the QR code

*AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.

** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).

PROSTAT PLUS BLACK GARLIC

benign prostatic hyperplasia

chronic prosta titis

frequent urination

weakened bladder function

PROSTAT PLUS is intended for the following conditions:

For men aged 45+

- Benign prostatic hyperplasia (enlarged prostate)
- Frequent and difficult urination
- Weakened bladder function
- Chronic prostatitis
- Prevention of prostate enlargement and associated symptoms

<https://www.alivitpharm.com/en/product/prostat-plus/>

Enlarged prostate, also known as benign prostatic hyperplasia (BPH), is the most common prostate condition in men over fifty. It may result from genetic predisposition, an unhealthy lifestyle, or poor diet.

Prostat Plus contains plant extracts that help relieve symptoms associated with benign prostatic hyperplasia and chronic prostatitis. It also supports bladder function and helps reduce frequent urination

- 90 softgel capsules
- Dietary supplement
- Gluten-free

Dosage: 3 X 1 capsule during or after a meal.

WHY PROSTAT PLUS?

In addition to its antioxidant properties, **fermented garlic** possesses antimicrobial and anti-inflammatory characteristics, making it significantly valuable in the treatment of chronic prostatitis, benign prostatic hyperplasia, and compromised bladder function.

Turmeric exhibits antimicrobial, antioxidant, and anti-inflammatory properties, diminishes cytokine synthesis, and alleviates symptoms related to chronic prostatitis.

Black pepper possesses significant antioxidant properties and enhances the absorption of certain medications, including rifampicin, sulfadiazine, tetracyclines, and phenytoin. It also increases the bioavailability of various active compounds, such as curcumin.

Vrbovica is utilized in the management of prostate disorders, particularly for patients diagnosed with benign prostatic hyperplasia. Beyond its beneficial effects on prostate conditions, it is also advised for ailments affecting the urinary bladder and kidneys.

Nettle exhibits a diuretic effect, promoting urine secretion, and in addition to this diuretic property, it also possesses anti-inflammatory effects, making it advisable for various urinary tract infections.

Zn

→ is necessary for prostate cells, which require about ten times more zinc than other cells in the body. It is also important for the correct balance of testosterone. Men with low zinc levels are at higher risk of developing prostate cancer.

Se

→ contributes to normal fertility, reproduction and protection of cells from oxidative stress.

VITAMIN E

→ It aids in preserving a healthy prostate and may alleviate symptoms of inflammation.

For references and more information, scan the QR code

**AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.*

*** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).*

TIREOPLUS BLACK GARLIC

reduces nervous tension and anxiety

powerful antioxidant

supports normal thyroid function

helps in cases of acute thyroiditis and hyperthyroidism

TIREOPLUS is intended for the following conditions:

- Thyroid disorders
- Support in the development of hypo- or hyperthyroidism, including Hashimoto's disease
- Thyroiditis (mild hormonal imbalance)
- Mild hormonal imbalance
- For women with polycystic ovary syndrome (PCOS) to help maintain hormone levels within the normal range
- Preventive use – for individuals with a genetic predisposition

<https://www.alivitpharm.com/en/product/tireoplus/>

Thyroid hormones influence all cells and organs in the body by regulating metabolism, i.e., the rate at which calories are burned. They affect heart function and the entire cardiovascular system, control muscle contraction, are essential for brain and spinal cord development, regulate body temperature and mood, generate energy, and support many other physiological processes. When thyroid function slows down, the balance of thyroid hormones can be disrupted, leading to a range of nonspecific symptoms that highlight their significant impact on health and quality of life.

TireoPlus capsules contain powdered bulbs of fermented garlic and aerial parts of motherwort, which, through their synergistic effects, support normal thyroid function and protect cells from oxidative stress.

- 90 hard capsules
- Dietary supplement
- Gluten-free

Dosage: 2 X 1 capsule during or after a meal.

WHY TIREOPLUS?

Fermented garlic exhibits anti-inflammatory and antioxidant properties, supports normal thyroid function, and may be recommended in cases of acute thyroiditis.

Motherwort can be used as an adjunct in managing pathophysiological conditions such as stress, anxiety, panic attacks, nervousness, irritability, insomnia, hyperthyroidism, and Graves' disease, while also contributing to the normal functioning of the thyroid gland.

It is a component of the enzymes responsible for thyroid hormone conversion and, in addition, acts as a powerful antioxidant.

It is essential for hormone synthesis as an integral part of T3 and T4, as well as for normal thyroid function.

It contributes to the protection of cells from oxidative stress and is necessary for proper nerve and muscle fiber function.

For references and more information, scan the QR code

**AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.*

*** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).*

ALISEPT

assists in addressing bacterial and fungal urinary infections

alleviates symptoms associated with urination in urinary tract inflammation

enhances the efficacy of antibiotics and antimycotics, resulting in a more rapid attainment of desired outcomes

ALISEPT is intended for the following conditions:

- Inflammation and bacterial/fungal urinary tract infections
- Patients with a catheter
- Alongside antibiotic therapy to enhance the effect of antibiotics and antifungals
- Alongside treatment for Escherichia coli (E. coli) and Candida infections
- Prevention in individuals prone to frequent urinary tract infections
- Prevention in individuals with weakened immunity

<https://www.alivitpharm.com/en/product/alisept/>

Urinary tract infections and the discomfort they cause, particularly during urination, occur much more frequently in women than in men. This is primarily due to reduced local immunity in the bladder.

Alisept capsules contain plant extracts recommended for alleviating symptoms of urinary tract inflammation and bacterial infections. They can also be used preventively in individuals prone to frequent urinary tract infections.

- 90 softgel capsules
- Dietary supplement
- Gluten-free

Dosage: 3 X 1 capsule during or after a meal.

WHY ALISEPT?

Fresh garlic has long been recognized as one of the most effective plant species against bacterial infections. Numerous studies have shown that the oil extract of fresh garlic exhibits broad-spectrum antimicrobial activity, including against antibiotic-resistant bacteria.

Parsley acts as a diuretic and has mild antispasmodic effects, making it useful for relieving cramps associated with urinary tract conditions in both men and women. It also demonstrates strong antifungal properties and is highly effective against fungal infections.

Oregano possesses strong antimicrobial, anti-inflammatory, antioxidant, hypoglycemic, and antimutagenic properties. It enhances the effectiveness of therapy in the treatment of fungal infections caused by *Candida* spp.

Cornelian cherry (*Cornus mas*) exhibits very strong antioxidant, anti-inflammatory, and antimicrobial activity. It has shown positive effects in malaria therapy as an antiprotozoal and is used in the treatment of urinary tract infections in both men and women.

Horseradish is used to boost immunity, protect against colds, clear the respiratory tract, and prevent microbial growth. Its antimicrobial activity has been particularly noted in the treatment of bacterial infections of the respiratory tract and bladder. Horseradish also improves circulation, largely due to its high antioxidant and anti-inflammatory potential.

Cranberry contains proanthocyanidins, which help inhibit urinary tract infections. Its high content of natural acids lowers the pH in the urinary tract, preventing the growth and adhesion of pathogenic bacteria to the urinary tract walls. This makes cranberry a plant with pronounced uroantiseptic effects.

Peppermint has antispasmodic, antimicrobial, anti-inflammatory, carminative, choleric, and chologogic properties. It can also be used as an antidiarrheal and as an antioxidant.

PARAZIT STOP COMPLEX

BLACK GARLIC

contributes to the disappearance of intestinal parasites

improves digestion

contributes to the normal function of the digestive tract

stimulates the growth of beneficial intestinal microbiota

<https://www.alivitpharm.com/en/product/antiparazit-complex/>

According to the World Health Organization, more than 1.5 billion people suffer from helminth infections, which represents a serious public health problem. Protozoal infections, such as malaria and amebiasis, are responsible for a high mortality rate, especially in tropical regions, where conditions for the spread of these infections are favorable.

Parasitic infections can manifest in the form of digestive symptoms (diarrhea, vomiting, abdominal pain, bloating), neurological symptoms (sleep disturbances, headaches, neurological dysfunction), systemic symptoms (fatigue, weakness, anemia, weight loss), as well as dermatological manifestations (pruritus, rashes, ulcerations).

- Parazit Stop I: 28 soft gelatin capsules
- Parazit Stop II: 60 soft gelatin capsules
- Dietary supplement

Parazit Stop I dosage: 2 capsules in the morning (14 days)

Parazit Stop II dosage: 2 capsules in the evening (30 days)

* Our products have a high tolerance when used simultaneously with pharmacotherapy for various pathological conditions.
* In addition to the effect on the primary indication, all preparations have a beneficial effect on a number of other metabolic disorders (hypertension, dyslipidemia, diabetes, atherosclerosis, etc.)

WHY PARAZIT STOP COMPLEX?

PARAZIT STOP I

Thyme is used as a natural anti-parasitic. Research has shown that thyme extract has a significant effect on parasites such as Giardia and intestinal helminths.

Fig leaves contain enzymes that break down the protein structures of helminths. They are key in the process of breaking down helminths, which contributes to their efficient elimination from the body.

Clove contains eugenol and tannins that destroy parasite eggs and larvae, preventing their replication and spread.

Artemisia damages the cells of parasites, reducing their ability to survive and reproduce. The active ingredients damage the cellular structure of larvae and adult helminths.

Ginger facilitates the expulsion of parasites and reduces inflammatory reactions caused by the parasites present.

PARAZIT STOP II

Garlic and fermented garlic, with the help of the active component S-allyl cysteine, interfere with the work of the enzyme systems of parasites, thereby reducing their ability to survive and reproduce.

Papaya breaks down the protein structure of parasites, which facilitates their elimination from the body.

Black walnut shells inhibit the proliferation of parasites and contribute to the detoxification of the body.

Black pepper improves the bioavailability of other components and exhibits antimicrobial properties, contributing to overall better health.

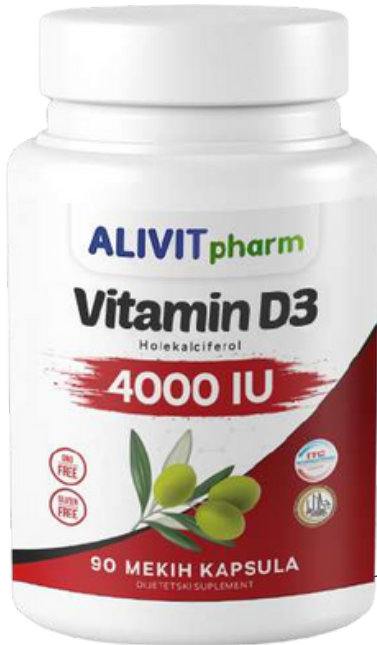

Turmeric has anti-inflammatory effects, reducing oxidative stress caused by parasitic infections.

Oregano damages the cell membranes of protozoa and helminths, leading to their apoptosis.

VITAMIN D3 4000 IU

contributes to the maintenance of bone health

contributes to the maintenance of normal muscle function

helps normal absorption/utilization of calcium and phosphorus

enables the normal functioning of the immune system

<https://www.alivitpharm.com/en/product/vitamin-d3-4000-iu/>

Vitamin D is much more than a vitamin. Because of its many functions, some scientists consider it not just a vitamin, but a prohormone. Like hormones, it is produced in one part of the body, transported through the blood and has a targeted effect on other organs and tissues. Its molecular structure also resembles hormones such as estrogen and cortisol, since it belongs to the group of sterol compounds. Thanks to its hormonal functions, vitamin D plays a key role in regulating bone and muscle health, supporting the immune system, maintaining optimal insulin and blood sugar levels, as well as in the metabolism of calcium and phosphate. When used as a dietary supplement, vitamin D3 achieves its highest bioavailability in the form of soft gelatin capsules that contain vitamin D3 in liquid form, allowing its optimal absorption in the body.

- 90 soft gelatin capsules
- Dietary supplement
- Gluten-free

Dosage: 1 X 1 capsule during or after meals.

WHY VITAMIN D3 4000 IU?

→ **Vitamin D**, which functions primarily as a hormone, plays an important role in regulating calcium and phosphate homeostasis, metabolism, immune responses to infections, and in the prevention of autoimmune diseases and cancer. It also contributes to the maintenance of cognitive function, as well as bone and muscle health.

Its role in the development of nerve cells is particularly important, and vitamin D deficiency is associated with a number of neurodegenerative diseases, such as multiple sclerosis, Parkinson's disease, Alzheimer's disease, amyotrophic lateral sclerosis, and epilepsy. In addition, vitamin D has a significant impact on heart and blood vessel health by helping to regulate blood pressure and reduce the risk of cardiovascular disease.

Vitamin D deficiency is also associated with an increased risk of mental disorders. Its most active metabolite, calcitriol, influences the immune response of macrophages and dendritic cells and participates in the activation of T and B lymphocytes. Scientific research has shown that vitamin D deficiency may be linked to the development of autoimmune diseases, including multiple sclerosis, type 1 diabetes, rheumatoid arthritis, psoriasis, and inflammatory bowel disease.

Vitamin D helps suppress inflammatory processes and regulates the growth of skin cells, which is why it is often used in the treatment of psoriasis. It also affects fibroblast growth factors, which are essential for healthy hair growth. Furthermore, vitamin D reduces the expression of the renin gene, leading to lower blood pressure and a reduced risk of hypertension, as well as cardiovascular and cerebrovascular diseases.

Mg-Bisglycinate + B6

enhances strength, alleviates fatigue and muscle cramps

alleviates tension, anxiety, and irritability

has a positive impact on anxiety and depression

assists with insomnia, headaches, and migraines

enhances focus

contributes to the preservation of bone and dental health, mitigating the risks of osteoporosis and osteopenia

assists with hypertension and diabetes

<https://www.alivitpharm.com/sr/производ/mg-&-more/>

This product integrates magnesium bisglycinate and vitamin B6, offering extensive support for the nervous system, muscles, and cognitive functions. Magnesium bisglycinate is characterized by its high bioavailability and ease of absorption, facilitating muscle relaxation and alleviating cramps. Vitamin B6 is essential for metabolism and the health of the nervous system, aiding in the reduction of fatigue and stress.

It aids in sustaining normal energy metabolism and alleviating tiredness and fatigue, supports the physiological functions of the nervous system and normal psychological processes, contributes to the maintenance of normal muscle function, bone mineralization, and electrolyte balance, while vitamin B6 further enhances the normal functioning of the immune system and the regulation of hormonal activity.

- 60 hard capsules
- Nutritional supplement
- Gluten-free

Dosage: 1 X 2 - 4 capsules taken during or after meals.

WHY MAGNESIUM BISGLYCINATE + B6?

→ Magnesium bisglycinate ($C_4H_8MgN_2O_4$) is recognized for its superior bioavailability, rendering it more effective in replenishing the body's magnesium stores compared to other forms, such as oxide or citrate. Its benefits also include enhanced tolerance, as it seldom induces digestive issues such as diarrhea or bloating, making it suitable for individuals with sensitive stomachs. As a vital cofactor in over 300 enzymatic reactions, magnesium plays a crucial role in protein synthesis, energy production, and the regulation of muscle and nervous system functions. The presence of the amino acid glycine further supports mental health, as it exerts a calming effect on the nervous system, alleviates stress and anxiety, and enhances sleep quality. Additionally, magnesium is essential for bone health, facilitating proper mineralization and calcium balance, which contributes to bone strength and resilience, particularly in individuals at an increased risk of osteoporosis.

A notable benefit of bisglycinate lies in its synergistic impact on mental health. The inclusion of glycine offers a soothing effect on the central nervous system, enabling the body to manage stress and anxiety more effectively. With consistent use, this supplement not only enhances energy levels and optimizes muscle function but also markedly improves sleep quality and the overall psychophysical stability of the body.

→ Vitamin B6 is an essential nutrient vital for the metabolism of proteins, amino acids, and carbohydrates. Its significance lies in energy release, red blood cell formation, and antibody production, which directly fortifies the immune system. Beyond metabolic support, vitamin B6 is necessary for the proper functioning of the nervous system and the maintenance of normal psychological functions. It serves as a natural catalyst that stimulates enzymatic processes and facilitates the transport of minerals to cells, ensuring their optimal utilization. As a regulator of hormonal activity and energy balance, this vitamin is an indispensable ally in combating fatigue and sustaining the overall vitality of the body.

Vitamin B6 is essential for the absorption and bioavailability of magnesium, enhancing its transport to cells and promoting more efficient utilization within the body. It stimulates the activity of enzymes that facilitate the proper absorption of magnesium in the intestines and aids in its binding to proteins, thereby optimizing its function.

** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).

OVARINOVA

aids in regulating the menstrual cycle and enhances ovulation in women with PCOS

supports hormonal equilibrium and may enhance fertility in women experiencing irregular cycles or other reproductive conditions

aids in alleviating menopause symptoms

facilitates the regularization of menstrual cycles

<https://www.alivitpharm.com/sr/proizvod/ovarinova/>

Polycystic ovary syndrome (PCOS) – Support for hormonal balance and reproductive health

Polycystic ovary syndrome (PCOS) is among the most prevalent hormonal disorders affecting women, manifesting between puberty and menopause. The World Health Organization (WHO) reports that over 116 million women globally (3.4%) are impacted by this condition. A crucial aspect of managing PCOS involves addressing insulin resistance, which frequently occurs in women with this syndrome.

Myo-inositol and D-chiro-inositol have been demonstrated to reduce insulin resistance, thereby enhancing metabolic health and positively influencing reproductive function.

Hemp also promotes hormonal equilibrium by modulating prolactin levels, which are crucial to the female endocrine system.

Ovarinova offers extensive support for ovarian health, fertility, and hormonal equilibrium. This product is particularly advantageous for women seeking to enhance reproductive health, mitigate menopausal symptoms, or sustain hormonal balance across various life stages.

- 120 hard capsules
- Nutritional supplement
- Gluten-free

Dosage: 2 x 2 capsules taken during or after meals.

WHY OVARINOVA?

Chaste tree (*Vitex agnus-castus*) aids in the regulation of hormones, particularly estrogen, which is crucial for alleviating menopausal symptoms. It mitigates hot flashes, night sweats, and mood swings associated with menopause, thereby enhancing the quality of life for women during this phase. Its antioxidant properties protect cells from oxidative stress and diminish inflammation within the body. Additionally, it helps regulate prolactin levels, which are vital for maintaining hormonal balance that influences fertility and lactation. Furthermore, it exerts a calming effect on the nervous system, assisting in the relief of anxiety and insomnia symptoms.

Myo-Inositol and D-Chiro Inositol – Essential Components for Health and Fertility

Myo Inositol plays a crucial role in the regulation of metabolic processes and the maintenance of cellular health. Its capacity to enhance cellular sensitivity to insulin aids in the management of blood glucose levels, which is particularly advantageous for women with polycystic ovary syndrome (PCOS). Myo Inositol can facilitate ovulation and lower elevated androgen levels commonly associated with this condition. Additionally, it supports ovarian function and contributes to the regulation of the menstrual cycle. The use of Myo Inositol also diminishes the risk of developing type 2 diabetes, particularly in women exhibiting insulin resistance.

D-Hiro Inositol is instrumental in regulating metabolism and maintaining hormonal equilibrium. It diminishes insulin resistance, enhances ovarian function, and elevates the likelihood of ovulation in women with PCOS. When used in conjunction with Myo Inositol, it further increases the probability of pregnancy and enhances fertility in women facing reproductive challenges. Additionally, D-Hiro Inositol mitigates the risk of cardiovascular disease by lowering triglyceride levels and improving the lipid profile. Furthermore, it promotes cellular health and reduces oxidative stress, which is vital for the overall well-being of the organism.

The synergy of Mio and D-Hiro Inositol offers extensive support for metabolic equilibrium, fertility, and women's health, rendering them indispensable supplements for women experiencing hormonal imbalances and fertility challenges.

REVITOX BLACK GARLIC

contributes to energy production (enhances muscle strength and endurance)

safeguards the body against oxidative stress

improves cognitive functions

detoxifies the body, diminishes the risk of obesity and diabetes

results in the regeneration of all cells within the body

regulates and rectifies metabolic imbalances

provides protection against neurodegenerative changes

<https://www.alivitpharm.com/sr/produkt/revitox/>

Revitox – a sophisticated formulation for longevity and vitality

Revitox is a groundbreaking dietary supplement that integrates potent bioactive components: NMN, EGCG, dihydroquercetin, resveratrol, and fermented garlic, each recognized for their remarkable health advantages. This meticulously curated blend promotes the elevation of NAD+ levels, a crucial coenzyme for energy metabolism and optimal cellular function, thereby decelerating the aging process. The synergistic effects of these ingredients enhance energy, vitality, and overall health, fortifying both body and mind. Revitox not only aids in the prevention of aging but also actively fosters physical and mental well-being.

- 120 hard capsules
- Nutritional supplement
- Gluten-free

Dosage: 1 X 2 capsules taken during or after meals.

WHY REVITOX?

Fermented garlic purifies the body and bolsters the immune system. Our fermented garlic is more than a mere supplement; it serves as a natural barrier, effectively eliminating accumulated toxins and promoting overall health and balance. It acts as your defense against external adversities.

EGCG

EGCG (Epigallocatechin gallate) is the most potent antioxidant found in green tea. It is recognized for its capacity to detoxify the body, enhance metabolism, and impart a lasting sense of lightness and freshness throughout the day. This natural stress alleviator aids in restoring balance to the body, equipping it with the resilience to confront life's challenges.

NMN

Nicotinamide Mononucleotide (NMN) is the key to boundless energy originating from within. NMN activates the natural process of cellular regeneration, rejuvenating the vitality and energy you may have overlooked. This potent ingredient revitalizes strength, refreshes both mind and body, enabling you to experience the power that emanates from the depths of your cells.

RESVERATROL

Resveratrol is a valuable natural antioxidant that safeguards the heart and blood vessels, rejuvenates skin health and youthful luminosity, and aids in the regulation of body weight and blood sugar levels. It is a vital component for the overall well-being of the body, offering extensive protection.

QUERCETIN

Dihydroquercetin is a distinctive antioxidant that safeguards blood vessels and facilitates optimal bodily function. It aids in managing daily stressors, thereby restoring inner strength and stability. This potent blend of ingredients positions Revitox as your discreet partner in sustaining vitality, offering extensive health support that ranges from optimal metabolism to mental wellness.

*AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.

** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).

ANEMI CARE

- Prevention of Anemia and Iron Deficiency
- for excessive and extended menstruation
- in individuals on restrictive diets
- assistance with recovery following hemorrhage, surgical procedures, and chronic conditions involving blood loss
- for recurrent colds, infections, overall weakness, chronic fatigue
- convalescents following infections, including COVID, influenza, and others.
- for women during the reproductive period
- in individuals with cold extremities, mild venous insufficiency, recovery following physical exertion

<https://www.alivitpharm.com/sr/производ/revitox/>

ANEMI CARE capsules offer comprehensive and targeted support for iron deficiency by combining essential mineral active ingredients with meticulously chosen herbal synergists to ensure optimal effectiveness, while maintaining good stomach tolerance and a gentle impact on the digestive system.

This formulation is designed to prevent and alleviate anemia in women during their reproductive years who experience heavy or irregular menstruation, as well as in pregnant women, vegetarians, and children. It also aids in recovery following blood loss due to menstruation, donation, or surgery. The combination of iron and vitamin C enhances optimal oxygen transport and boosts energy levels, while folic acid supports normal blood cell formation and proper cell division. Additionally, nettle, beetroot, and kale further enhance circulation, promote detoxification, and increase overall vitality, thereby helping to maintain the body's strength and endurance.

- 120 hard capsules
- Nutritional supplement
- Gluten-free

Dosage: 1 X 2 capsules taken during or after meals.

WHY OVARINOVA?

Beetroot powder (*Beta vulgaris*)

It is abundant in natural iron, vitamins, and antioxidants, aiding in blood formation, enhancing circulation, and promoting overall vitality.

Nettle powder (*Urtica dioica*)

It is rich in iron and other essential minerals, bolsters the immune system, enhances circulation, and mitigates the risk of iron deficiency, all while promoting energy and vitality.

Kale leaf powder (*Brassica oleracea var. acephala*)

It is abundant in iron and folic acid, promotes blood formation and the proper functioning of the immune system, and aids in the prevention of anemia.

Acerola fruit powder (*Malpighia glabra*)

Rich in vitamin C, it improves iron absorption, protects cells from oxidative stress, and bolsters the immune system.

Iron plays a crucial role in the normal formation of red blood cells and hemoglobin, enhances oxygen transport throughout the body, and aids in the reduction of tiredness and fatigue.

Vitamin C enhances the absorption of iron from both food and supplements, and in conjunction with iron, supports the normal functioning of the immune system and alleviates fatigue.

Folic acid facilitates the formation of normal blood cells and ensures proper cell division, both of which are essential for the prevention and treatment of anemia.

**AlivitPharm products demonstrate high tolerability when used concomitantly with pharmacotherapy for various pathological conditions.*

*** In addition to their effect on the primary indication, all products exert beneficial effects on a range of other metabolic disorders (hypertension, dyslipidaemia, diabetes, atherosclerosis, etc.).*

COENZYME Q10

neutralizes free radicals and safeguards cell membranes

aids in the prevention of LDL cholesterol oxidation

contributes to optimal cellular function and metabolism.

support for organs with elevated energy requirements – heart, liver, kidneys, pancreas.

<https://www.alivitpharm.com/sr/производ/koenzim-q10/>

Coenzyme Q10 capsules serve as a dietary supplement recommended for cardiovascular diseases and may also provide support for statin therapy (medications aimed at reducing cholesterol and triglycerides). As we age, the body's natural production of coenzyme Q10 diminishes, making it essential to obtain this nutrient through diet or supplementation. Coenzyme Q10 is present in every cell, predominantly within the mitochondria, where it plays a crucial role in energy production processes.

This coenzyme aids in the prevention of atherosclerosis and the protection of blood vessels, enhances cardiac function and metabolic parameters, boosts antioxidant production, and diminishes vascular oxidative stress, particularly in individuals with hypertension. Additionally, it plays a role in maintaining muscle function. A deficiency in coenzyme Q10 may result in fatigue, diminished energy levels, impaired cognitive functions, and a reduction in the body's resilience.

- 30 hard capsules
- Nutritional supplement
- Gluten-free

Dosage: 1 X 2 capsules taken during or after meals.

K2 D3

- 30 soft gelatin capsules
- Nutritional supplement
- Gluten-free

K2 D3 capsules comprise vitamin D3, vitamin K2, and olive oil, meticulously blended to ensure optimal absorption and efficacy.

Vitamin D3 is essential for sustaining bone health and ensuring normal muscle function. It facilitates the effective absorption and utilization of the minerals calcium and phosphorus, which are vital for bone strength. Additionally, Vitamin D3 is involved in the process of cell division, crucial for the body's normal functioning, and supports the proper operation of the immune system.

Vitamin K2 promotes bone health by facilitating mineralization and the appropriate distribution of calcium within the body, thus aiding in the preservation of strength and functionality.

The olive oil contained in the capsules enhances the absorption of vitamins D3 and K2, thereby increasing their efficacy.

<https://www.alivitpharm.com/sr/производ/k2d3/>

SELENIUM

- 30 soft gelatin capsules
- Nutritional supplement
- Gluten-free

SELEN soft gelatin capsules support the normal functioning of the immune system, promote the maintenance of healthy hair and nails, and protect cells from oxidative stress. Selenium is also essential for the proper operation of the thyroid gland and aids in normal spermatogenesis in men.

This vital mineral plays a key role in the synthesis of antioxidant enzymes, safeguarding the body against free radicals and oxidative cellular damage, thereby aiding in the maintenance of vitality and overall health. Consistent consumption of selenium also facilitates the metabolism of thyroid hormones, which is essential for energy regulation and optimal bodily function. In men, selenium is instrumental in sustaining normal sperm production and quality, thereby enhancing reproductive health.

<https://www.alivitpharm.com/sr/производ/selen/>

- 30 soft gelatin capsules
- Nutritional supplement
- Gluten-free

OMEGA-3 + VITAMIN E

Omega-3 and Vitamin E capsules comprise fish oil and vitamin E.

Fish oil is abundant in omega-3 fatty acids, specifically eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA), which support the normal functioning of the heart and cardiovascular system.

DHA plays a crucial role in sustaining normal brain function and promoting healthy vision. This beneficial effect is attained through a daily consumption of 250 mg of combined omega-3 fatty acids (EPA and DHA).

Vitamin E serves as a potent antioxidant, safeguarding cells from oxidative stress and thereby playing a crucial role in preserving overall health while mitigating damage induced by free radicals. Regular consumption of OMEGA3 + VITAMIN E® capsules promotes cardiovascular, cognitive, and ocular health, safeguards cells against oxidative damage, and enhances the overall vitality of the body.

<https://www.alivitpharm.com/sr/производ/omega3-vitamin-e/>

- 100 soft gelatin capsules
- Nutritional supplement
- Gluten-free

CINK BISGLYCINATE COMPLEX

Zinc Bisglycinate Complex capsules comprise zinc, vitamin C, blackcurrant leaf, acerola fruit, and pomegranate.

Zinc plays a vital role in the synthesis of DNA and proteins, carbohydrate metabolism, cognitive function, and the maintenance of bone health, in addition to supporting the proper functioning of the immune system. Furthermore, it aids in the preservation of healthy hair, skin, and nails while safeguarding cells against oxidative stress.

Vitamin C plays a vital role in the proper functioning of the immune system, alleviating tiredness and fatigue, and supporting normal physiological function.

Blackcurrant leaf possesses analgesic properties that alleviate pain, including muscle and joint discomfort. Additionally, it exhibits antihypertensive effects by lowering arterial blood pressure and enhancing capillary function in the skin.

Rosehip enhances immune system function, bolsters the body's resistance to microorganisms, and promotes overall physical well-being.

Acerola is abundant in vitamin C and enhances immune defense, while in conjunction with other components, it promotes energy, vitality, and overall well-being.

<https://www.alivitpharm.com/sr/производ/cink-bisglicinat-complex/>

At the Western Balkans Chamber of Commerce Investment Forum in Skopje, the company was awarded the title of the Most Innovative Company in the Western Balkans for 2022, selected from over 260,000 companies, in recognition of its unique Black Garlic dietary supplement range formulated from fermented garlic and carefully selected medicinal plant extracts.
